

Bentek Solar introduces the first 1MW Circuit Breaker Re-Combiner

Circuit Breakers provide both individual disconnects and circuit protection

RE-COMBINERS FOR LARGE PHOTOVOLTAIC PROJECTS

Re-Combiner Product Features (250Kw to 1MW)

- ▶ **Circuit breaker serves as an individual disconnect in addition to providing circuit protection**
- ▶ **Supports 250kw to 1MW solar inverters**
- ▶ **100A, 200A and 400A circuit breakers**
- ▶ **Circuit breakers either 600VDC or 1000VDC.**
- ▶ **Optional current sense.**

Finally no fuses to worry about with these Circuit Breaker Re-Combiners. These Re-Combiners provide maximum performance and maximum safety with UL489 breakers. The breaker itself serves as a disconnect in addition to providing circuit protection. Designed to provide the final interface to the inverter on large commercial or utility PV systems. Flexible design for customization and ease of installation.
