## **Bentek Solar Receives Initial Orders for Its Industry Leading 1000VDC 400 Amp Integrated Disconnect Combiners**

**SAN JOSE, CA — December 2010** – Bentek Solar, a leader in the design and manufacture of optimized Configure-To-Order solar combiners, re-combiners and solar safety systems, announces that the company is now accepting initial orders for the new industry-leading 1000VDC 400 Amp family of integrated disconnect combiners.

“We are pleased to receive positive market acceptance of our newest full 1000VDC 400 combiner models. Clearly, there is a need in the marketplace for combiners that can meet the increasing power requirements of today’s new solar projects,” said Mitch Schoch, President and CEO of Bentek Solar.

“The large industrial and utility solar systems in North America and Canada are clearly shifting from 600VDC to 1000VDC systems. Bentek Solar has a full range of solar products from fused combiners and re-combiners to circuit breaker re-combiners and solar safety systems that are designed and manufactured specifically for the 1000VDC industrial and utility marketplace,” said John H. Buckley, Sales and Marketing for Bentek Solar.

Disconnect combiners with integrated 1000VDC load-break disconnects reduce costs by eliminating installation, time and wiring. The combiners feature a flexible design for customization and ease of installation as well as an enhanced level of user safety.

For more information about Bentek Solar's 1000VDC products and specific 1000VDC 100A, 200A and 400A Integrated Disconnect Combiners, or to view online data sheets, please visit [www.BentekSolar.com](http://www.BentekSolar.com).

**About Bentek Solar**

Founded in 1985, Bentek is a leader in manufacturing and engineering solutions for complex electro-mechanical and power distribution systems for the semiconductor and solar industries. Bentek has applied these extensive capabilities and knowledge into a comprehensive family of standard and configure-to-order (CTO) solar combiner products. These solar combiners provide quality, ease of installation and safety to the solar industry.
