July, 2011

As a valued partner of Graybar Canada, we would like to share some news with you about the renewable energy business at our company. As this market continues to grow, we have created a new company, Graybar Energy Ltd., to comply with domestic content for the Feed In Tariff (FIT) program in Ontario.

Graybar Energy, a wholly owned subsidiary of Graybar Canada, will continue to be based out of Kitchener, Ontario with a national focus on the renewable energy market. All customer inquiries, quotations and orders related to renewable energy will now go through Graybar Energy in order to comply with current government regulations.

Although these changes will not affect the way business is done with our suppliers, we wanted to communicate the changes to you so you are aware of them. If you have any questions, please contact one of the dedicated specialists at Graybar Energy Ltd. as listed below:

**Rob Horst, National Market
Manager – Renewable Energy**
