

Company Description

Bentek Corporation, founded in 1985 in Silicon Valley, is a company with two divisions. The Contract Manufacturing Services division provides comprehensive New Product Introduction (NPI) support and volume turnkey manufacturing to high-growth companies in various market segments. The Utility Scale electrical Balance of System (eBOS) OEM equipment division develops and provides vertically integrated products for the Solar Power energy market. Bentek Corporation values innovation, excellence, and leadership in their respective markets and is currently expanding into new segments including robotics, medical technology, and industrial automation.
